▶ THE VALUE OFFERING

WHY AM I A STRATEGIC PARTNER?

I believe that:

- business needs a strong voice in economic development in Greater Moncton.
- 3+ Corporation is the best opportunity for our business community to have that strong voice.
- to succeed, 3+ Corporation needs business financial support.

This financial support is not a donation; it's an investment on which you will receive a financial return. Prosperity in our community creates profit in our businesses. Continued prosperity creates continued profits, which is our return on investment.

“ **Strategic partnership contribution is not an expense, it's an investment.** ”

I choose to be a Strategic Partner and support 3+ Corporation because we are fortunate to live in a community that enjoys prosperity. Our company is better and stronger because of this prosperity. It didn't happen by accident. It happened because of the contribution of both time and money made by people thirty, twenty and ten years ago. We benefit from the contribution of others who came before us. When we write our cheque for the Strategic Partnership Program of 3+ Corporation, we make an investment in the continued prosperity and growth of our unique community. We have an obligation to do our part and by doing so will enjoy the financial benefits of continued success. Without meeting this obligation, we risk suffering the financial consequences of the adversity faced by so many communities in our province.

3+ Corporation is one of the most important voices of business in Greater Moncton's economic development. The voice of business is different than the voice of elected officials and the voices of municipal, provincial or federal governments working in economic development. The only way I can see the business community getting a strong voice is through 3+ Corporation as a key player to help influence and generate growth and future prosperity. Please take the time to understand the importance of your membership and the return you will receive before making a final decision.

“ **When you invest in 3+ Corporation, you invest in the voice of the business community.** ”

Economic development in our community is critical and I understand the financial benefits of my investment of time and money. This is a self-serving act. But more importantly, I invest in the Strategic Partnership Program because I care deeply about my community: I want a great community for my children, my family and friends and my employees. We have a good thing going, let's make sure we each do what we can to keep it going!

“ **We are not a community of accepting what we're given, we are a community of getting what we want.** ”

Dave MacFadyen,

Strategic Partner and Member of the Economic Leadership Committee (ELC)
